

Hey Software Identify IP equipment on a local network

Hey application locates IP streamers on a LAN (Local Area Network) using multicast Domain Name System (mDNS) service records. This easy and friendly interface allows the user to quickly detect the IP and MAC address assigned to the equipment, without the need to remember them.

Free software available for PC, and compatible with series T.OX streamers.

Ref.	100010
Logical ref.	HEY
EAN13	8424450228692
