

MyCloud portal Centralised management of the field strength meters

MyCloud is a measurement web portal that allows you to centralise the management of every MOISAIQ6 meter on the cloud of Televes by means of just one interface accessible from any device. This service offers efficient and cost-effective management to professionals who own a set of meters for different users. In addition, each user can comfortably manage their meter at any time from their own smartphone or device with an Internet connection.

Highlights

- Easy to use: Manage one or all of your meters through the same intuitive menus operated by your technicians on their meters
- Teamwork: Boost collaboration among the users of the meters by sharing real-time setting changes (on-line) or by scheduling them for a future sync (offline)
- Accessibility 24/7: Access available equipments anytime (online) and also data collected during

the latest sync (offline)

- Flexibility anywhere: Connect from any device thanks to its responsive interface that smoothly adapts to any device including a web browser
- Safe information: If fieldwork makes it impossible for the meter to connect to the Internet, your settings will be safe on our cloud until connection is restored
