Physical data

Net weight	60,000.00 g
Gross weight	60,000.00 g
Width	2,261.00 mm
Height	14,500.00 mm
Depth	1,958.00 mm
Main product weight	89,285.00 g

Highlights

- Made of AISI 316 stainless steel: removes iron impurities avoiding corrosion and providing an enhanced safety on the long term with reduced maintenance
- Virtually unlimited service life
- Saves 401m² space compared to a conventional tower: 14.5m high and only 1.5 m radius
- Better mechanical strength and torsional rigidity.
- Anchoring system with union nuts
- Made of 3m sections
- 1.5m guy wire radius

- Tower provisioning based on two references eases installation: installing the base kit in a first stage and completing the tower assembly in a second stage
