

VHF/UHF modulator Custom analogue channel generation

Home audio/video modulator capable of generating any analogue channel on the MATV band.

Ref.	5858
Logical ref.	VM5858
EAN13	8424450139806

Televés reserves the right to modify the product

Packaging info

Box	1 pcs.
------------	--------

Physical data

Net weight	227.00 g
Gross weight	227.00 g
Width	146.00 mm
Height	56.00 mm
Depth	35.00 mm
Main product weight	227.00 g

Highlights

- Equipped with an LCD display to show the current channel
- Fully automated manufacturing
- Equipped with gain regulation to generate an equilibrium between the level of the selected channel and the remaining channels in the installation

- Equipped with switch-mode power supply unit that optimizes energy efficiency

Main features

- Design based on the use of new generation micro-components, which allowed reducing both device size and power consumption
- The RF loop is compatible with SMATV installations and allows current circulation to power an LNB
- Allows the adjustment of the difference in levels between carriers by regulating the audio level
- Produces a test signal to facilitate the tuning of the generated channel

Application example
