

Coax IR Transmission through coaxial cable

This system allows the control of devices by means of infrared (IR) signal transmission using the existing coaxial network (for TV signals).

The kit includes one transmitter and one receiver (together with their feeders).

Ref.	7605
EAN13	8424450113370

Other features

Included items	Transmitter + Receiver
-----------------------	------------------------

Packaging info

Box	1 pcs.
Carton	6 pcs.
Bucket	40 pcs.

Physical data

Net weight	400.00 g
Gross weight	400.00 g
Width	53.00 mm
Height	31.00 mm
Depth	25.00 mm
Main product weight	68.00 g

Highlights

- Robust, far-reaching transmission: without any limitations, since the transmission is carried out via coaxial cable
- Without interference, thanks to the coaxial cable shielding
- Transmission distance up to 2 Km
