F.O. Patch Box pre-terminated 2 to 4 SC/APC outputs

Device enabled as a connection point to an optical fiber network. In communications infrastructures, it works as a cut-off and test point for the optical fiber network.

It incorporates optical fiber with one end pre-connectorised on the Patch Box, with 2 SC/APC connectors. This provides the installer with greater convenience and agility in assembly, allowing the fiber to pass through the different conduits to the desired point. The installer only has to do the fusion or connection 2 FO connectors at the connection point.

The design also allows installation in other types of premises (car repair shops, classrooms, work tables, wiring cabinets, etc.) and use as a connection point.

Mounting details

1. Select the most suitable entry for the fibre optic hose, maintaining a smoothly curved fibre path.
2. Cut in the cover the appropriate tab to the used entry.
3. Fit the fibre to the PAU, fix it with cable ties at the anchor points and connect it to the adapters.
4. Fix the PAU either to the wall, using the screws supplied, or to DIN by removing the pre-cut tabs on the cover.
