

Optical fiber cleaver

Cleaver capable of performing a precision cutting of the fiber (90°) for a perfect fusion (0.1 dB loss). Suitable for both single-mode and multimode fibers, it is equipped with guiding grooves for fiber positioning for 250 µm and 900 µm fibers with 3 mm external protection. Equipped with a container for fiber waste.

Provided with a protective carrying bag.

Ref.	232301
Logical ref.	OSMN
EAN13	8424450187968

Packaging info

Box	1 pcs.
------------	--------

Physical data

Net weight	440.00 g
Gross weight	440.00 g
Width	56.00 mm
Height	63.00 mm
Depth	85.00 mm
Main product weight	440.00 g

Highlights

- Equipped with a magnet slider for the blade, which prevents the premature wearing of tool
- Eases up the procedure thanks to the assisted opening of the cleaver
- High-precision cleaving for the 125-micron fiber diameter (90°)
- Equipped with a container to pick-up the fiber waste upon cleaving, thus ensuring operator's

safety

Main features

- Optimized for fibers with 250 µm and 900 µm protection, and fibers with 3 mm external protection
- Cleaving adjustment from 5 mm to 20 mm
- Blade working life higher than 16,000 cuts
