DTKom line broadband multiband amplifier 1 input: VHF/UHF/SAT + Return Ch.

High-power line (1 input/1 output) multiband amplifier with multiple controls on the front end, which design uses components that minimize the total noise figure. Amplifies both terrestrial and satellite (SAT) bands, as well as the return channel.

Ref.	533501
EAN13	8424450128855

Packaging info

Box	1 pcs.
Bucket	17 pcs.

Physical data

Net weight	1,838.00 g
Gross weight	2,150.00 g
Width	280.00 mm
Height	141.00 mm
Depth	50.00 mm
Main product weight	1,838.00 g

Highlights

- Separate amplification minimizes intermodulation between bands and provides high output levels
- Designed using Push-Pull technology, which guarantees levels in the 123 dB μ V range for

terrestrial signals.

- Includes a high-performance low-power consumption switch-mode power supply
- High-screening Zamak chassis The design facilitates appropriate cooling

Main features

- Pre-equalization and equalization stages
- Configurable gain for terrestrial band and return channel using two switches (high/low)
- Intuitive front cover, including adjustments and block diagram
- Output signal LED indicator

Application example

Reamplification for second distribution.
