Option Advanced API for H30+ & H30D+ meters

This option, which can be installed on the H30+ & H30D+, allows the remote configuration* of the devices according to the user's needs. Among the meter parameters that can be configured with this functionality, we can find:

- Language
- Network connection (wired or wireless)
- Units (dBuV, dBmV or dBm)
- Channel selection (within a pre-established channel plan)
- Channel frequency
- Plan selection (within the plans contained in the equipment)
- Channel identification (automatic or manual)
- Tuning (by channel or by frequency)
- Quality profile
- Bandwidth
- Audio level
- Spectrum span
- Spectrum reference level (automatic or manual)
- Scan type
- Input frequencies
- Input reference level (automatic or manual)
- Tilt features
- Auto suspend
- Auto power off

(*) To use of this option, the equipment must be connected to the network.

Ref.	593212
Logical ref.	H30API
EAN13	8424450177334

Packing

Unit	1 pcs.
-------------	--------

Physical data

Net weight	20.00 g
-------------------	---------

Gross weight	20.00 g
---------------------	---------

Highlights

- Compatible with the H30+ & H30D+ field strength meters
