

Fiberglass Column for CIES and AtmosLED

The fiberglass column for the CIES luminaire complements the product range by obtaining a Class II solution in a totally insulating material, making electrocution impossible and guaranteeing 100% electrical safety throughout the structure of the luminaire.

The pole material is totally immune to oxidation and corrosion, anti-magnetic and fire-resistant. In addition, the color durability is excellent, since the fiber is colored during manufacture, preventing degradation over time.

Moreover, the fiberglass construction makes the post very lightweight, making it easy to transport and install. Also, carbon emissions from transport are greatly reduced due to its lighter weight.

Ref.	690607
Logical ref.	POLE7AL
EAN13	8424450251843

Other features

Length 7.00 m

Packaging info

Unit 1 pcs.

Physical data

Net weight 31,500.00 g

Gross weight 31,500.00 g

Width 140.00 mm

Height 7,070.00 mm

Depth 140.00 mm

Highlights

- 100% electrical safety: class II electrical protection without the need for grounding
- Lightweight: facilitating transport and installation of the column
- Durability: immune to corrosion and oxidation
