Transceiver For IPTV Switches (8314xx), RJ-45

SFP (Small Form-Factor Pluggable) Module, 10/100/1000TX with RJ-45 connector that offers a copper option to extend the network up to 100m.

Ref.	831505
Logical ref.	ATR-RJ
EAN13	8424450173800

Packing

Box	1 pcs.

Physical data

Net weight	33.00 g
Gross weight	40.00 g
Width	13.00 mm
Height	13.00 mm
Depth	57.00 mm
Main product weight	33.00 g

Highlights

- SFP module
- 10/100/1000T Structured wiring
- For connections up to 100m
- RJ-45 connector

What is a SFP?

The Small Form-Factor Pluggable (SFP) devices are adapters that generate an interface to allow access to an Ethernet signal through Optical Fiber. These devices can be connected to the inputs of different Ethernet and GPON equipment, allowing the transmission/reception of the information by connecting to sigle-mode or multi-mode fiber or Ethernet cables.
Among the advantages of using SFP modules, we can highlight the reduction of space, lower energy consumption, or the increase of transmission distances.

Which SFP do I need?

Based on the devices to which they are connected, the transmission speed, or the type of cable used, several options are available in the whole range of media converters. The compatibility between the SPFs and the different Ethernet and GPON equipment is described below.
