

## Ceiling Support for 2 Modules Flex Floodlights

Support for ceiling mounting of Flex Floodlights with 2 Modules. It is designed for the installation of Flex Floodlights indoors, especially for those with large open spaces, such as sports centres, sports stadiums or trade fair venues. Thanks to the ceiling anchorage, the need to install towers and poles on the ground is avoided, leaving the space free for activities, while maintaining an adequate level of illumination.

It allows a rotation of the floodlight up to 40°, to direct the light beam towards the area of interest.

It is made of grey lacquered aluminium. Aluminium provides the right balance between strength and lightness, making it a very durable and easy-to-install complement.

<b>Ref.</b>	690322
<b>Logical ref.</b>	FFH2
<b>EAN13</b>	8424450271902

### Packaging info

<b>Unit</b>	1 pcs.
