

Vertical Cable Organizer for Rack 19" 27RU, with 6 guide rings

It allows us to organize efficiently the rack wiring, thereby improving the access to it and its appearance

It has rear and side openings that allow easy distribution of the wiring in the different heights of the rack. The metal structure helps dissipate heat and the open design allows air to circulate, limiting temperature rise. This is especially important in Ethernet network distribution racks, as PoE cables are often used, which can get hot when power is passed through them. It includes a front cover to protect the cables, prevent them from coming out and also improve the aesthetics of the rack by keeping them hidden.

This is a single piece designed for 42U racks, but can be cut to fit other racks. Dimensions (W x H x D): 95mm x 1840mm x 70mm

Ref.	533166
Logical ref.	UVKF27
EAN13	8424450316894

Packaging info

Box	1 pcs.
