

## Tekniska specifikationer : Ref. 768564

|                                                     |     |                                                    |
|-----------------------------------------------------|-----|----------------------------------------------------|
| Number of Gigabit Ethernet ports (10/100/1000BaseT) |     | 1                                                  |
| WiFi standard                                       |     | 802.11 a/b/g/n/ac/ax (4x4) 2.4/5 GHz               |
| OFDM Modulations                                    |     | 1024-QAM / 16-QAM / 256-QAM / 64-QAM / BPSK / QPSK |
| Number of WiFi antennas                             |     | 8                                                  |
| 2.4GHz Antenna gain                                 | dBi | 5                                                  |
| 5GHz Antenna gain                                   | dBi | 6                                                  |
| Powering                                            | Vdc | 12                                                 |
| PoE input                                           |     | Yes                                                |
| Max. output current                                 | A   | 1,5                                                |
| Max. power                                          | W   | 19,5                                               |
| Operating temperature                               | °C  | 0 ... 40                                           |
| Relative humidity                                   | %   | 0 ... 90                                           |
